OUTSOURCING MANUFACTURING SERVICES

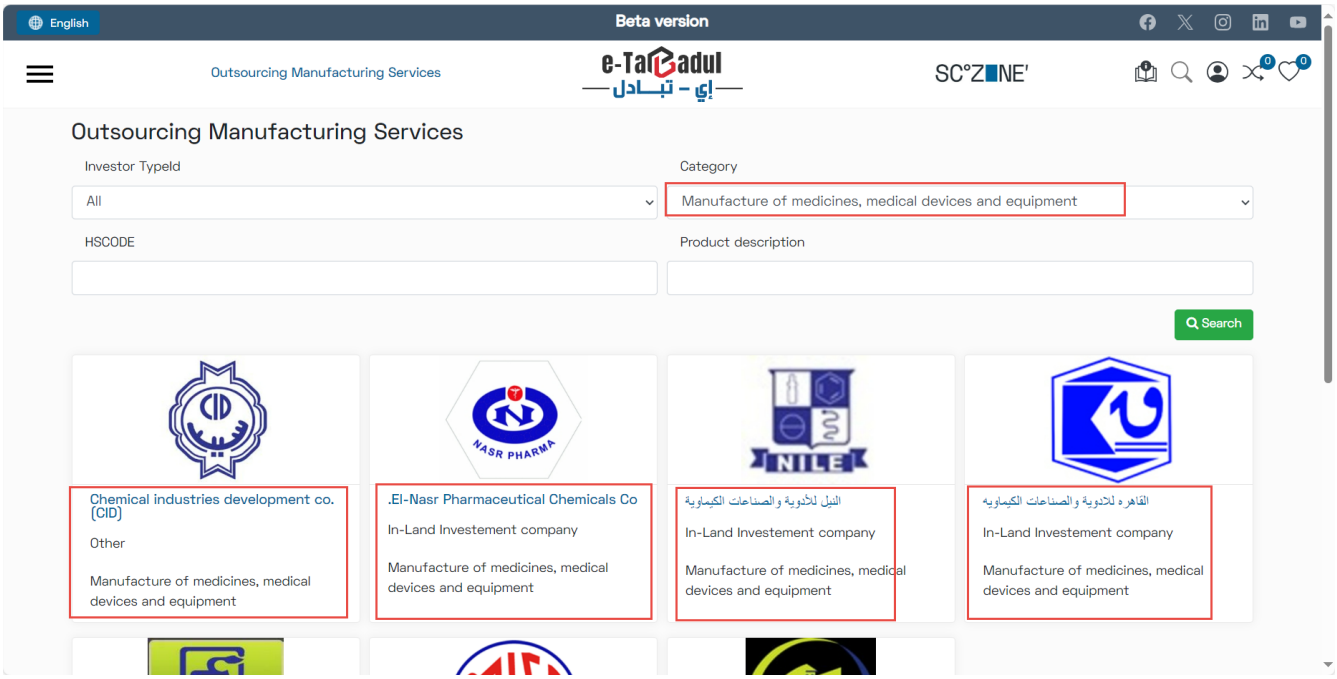

The purpose of this feature is to provide a link between individuals/companies who have potential power and individuals/companies who have manufacturing requests from third parties, where the visitor/company user can search for other companies that can manufacture products for him by the current features.

After clicking on **Outsourcing Manufacturing Services** button, all companies will be displayed on the portal and after clicking on the name of a company, its full data will appear, and accordingly, the user can view the company details, such as **address**, **requests**, **offers**, **manufacturing capabilities**, and **manufacturing requests**, as shown below.

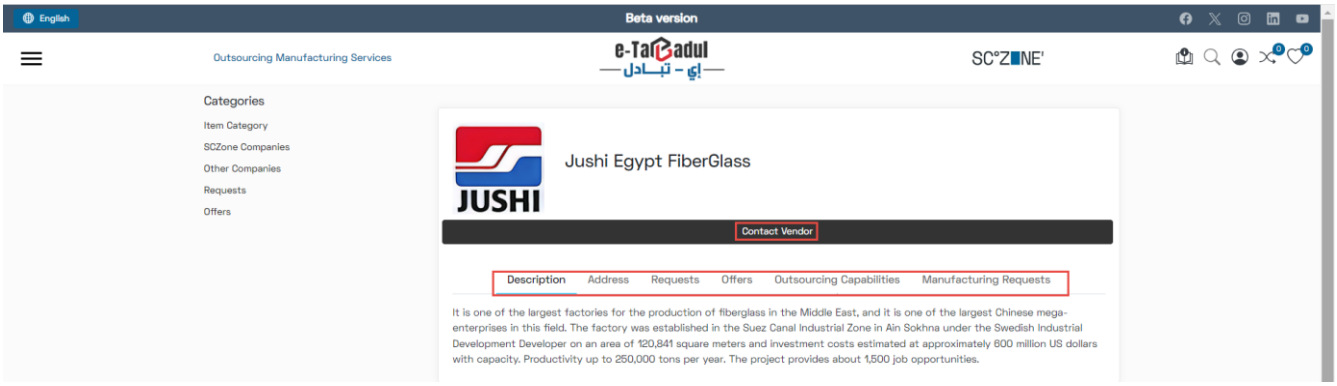

In addition, the company user can filter companies based on HSCode, Investor type or product description. If

know the words that describe the finished product, he can type them in the product description field.

To communicate with other company users, this is done by clicking on “Contact Vendor”. The company user must be registered to success this communication.

Here, the user can display the Outsourcing Capabilities and Manufacturing Requests, as shown below.
